

5     **FLUID DELIVERY SYSTEMS FOR DELIVERING FLUIDS TO MULTI-LUMEN  
CATHETERS**

ABSTRACT OF THE DISCLOSURE

10           Fluid delivery systems capable of introducing first and second fluids into first and  
second lumens of a multi-lumen catheter are provided. The first and second fluids are  
generally a dissolution fluid and a dissolution fluid attenuating fluid. Also provided are  
fluid delivery devices and kits that include the subject systems. The subject fluid delivery  
systems find use in a variety of different applications, and are particularly suited for use in  
15   the chemical ablation of internal vascular lesions.
